About us

IPI is a local life sciences company committed to improving access to healthcare and supporting the people we serve throughout the continuum of care.

From prevention to treatment, we transform scientific innovation into healthcare solutions, in oncology, hematology, diabetes, multiple sclerosis, and consumer healthcare.

Our Roots

- IPI is a proud Iraqi pharmaceutical company that started back in 1954. Our goal has always been to provide treatments that improve people's lives.
- Despite many challenges, our team and partners worked hard to open our factory in 1957, which was honored by a visit from King Faisal II.
- We built the factory in Baghdad with the help of the Belgian company UCB, following international standards, on a land of nearly 5,000 square meters.

Our History

- The vision behind IPI dates back to 1954 when it was conceived by Dr. Labib Rashid Mirza in collaboration with a committed group of pharmacists, specialists, and investors.
- We are a renowned pharmaceutical company, developing and producing top-tier medications distributed locally and globally.
- We aim to provide the finest healthcare solutions to enhance patients' lives and create a brighter tomorrow.
- With a strong commitment to cancer treatment, the company has risen to prominence as a key player in Iraq's pharmaceutical landscape.

Vision & Mission

Vision

A future where everyone has access to life-saving medications manufactured with high-quality ingredients and innovative solutions. Lead the pharmaceutical industry by advancing health preservation and offering cost-effective solutions worldwide.

Mission

Provide top-tier healthcare solutions, that improve patients' lives.

Strengthen the local pharmaceutical industry while expanding globally.

Business Goals

Innovating

Accessible, high-quality oncology and hematology medicines in Iraq.

Sustainability and Responsibility

Integrate ethics, sustainability, and meet international standards, serving Iraqi patients for better life.

Global Expansion

Expand to penetrate new markets for revenue diversification, wider brand presence, and global growth leverage.

Building Our Future

Through Strategic Goals

Manufacturing Capabilities & Focus

Specialized Products

- Oncology
- Hematology
- Diabetes
- Consumer health

Annual production capacity

- **Tablets:**
5,185,000,000 tab/year.
- **Capsules:**
1,450,000,000 cap/year.
- **Oncology tab:**
45,000,000 tab/year.
- **Oncology Cap:**
75,000,000 cap/year.

Quality control

- HPLC systems
- Gas chromatography system
- Microbiology testing suite
- Stability chambers
- Dissolution system app 1,2 and 3
- Potentiometric titration system

Production Capacity

- 4 dedicated production lines
- Oral solid dosage forms
- Sterile injectables facility-in process
- APIs facility-in process
- Biosimilars -in process
- Medical and non medical toothpaste plant

We focus on improving local access to critical cancer treatments. Our expansion plans include adding biosimilars manufacturing by 2025.

IRAQI PHARMACEUTICAL INDUSTRY CO.:

STRATEGIC PORTFOLIO EVOLUTION

Current portfolio

"Innovating Treatments, Transforming Lives."

Breast cancer
Prostate cancer
Renal cell carcinoma

CML , GIST, MMP, PV
GVHD, CLL, MCL, WM
Thalassemia, AML
and MMS

Pain killers
Antibiotics

Teriflunomide

Type II Diabetes.

Current Registered Portfolio:

Trade name	Scientific name	Strength	Dosage form	Pack size
Abiraterone IPI	Abiraterone IPI	250 mg	Tablets	120 Tablets
IPIJADE 125mg Dispersible tablet	Deferasirox	125 mg	dispersible tablet	4 ALU. / PVC blisters of 7 tablets in each, in packet with leaflet

Key Clients and Partnerships

IPI is successfully partnering with international medical companies with the aim of expansion & knowledge sharing to preserve the health of our patients' lives.

We are collaborating with PRU Pharmaceutical Research Unit. PRU is One of the leading Arab Pharmaceutical Industry Consulting Co. (APIC), which has been providing clinical services for over two decades to more than a hundred pharmaceutical companies throughout Europe, Asia, Africa, and the USA.

These partnerships mark a significant step forward in our commitment to advancing healthcare solutions.

Pharmacovigilance Role:

Patient Safety Starts with Vigilance:

At IPI, patient safety isn't a department—it's a responsibility we carry in every step of our work. That's why we've built a fully compliant Pharmacovigilance Department, dedicated to continuously monitoring the safety of our medicines from development through real-world use.

Our system meets both local and international pharmacovigilance standards, ensuring our products are not only effective but safe throughout their lifecycle.

Our Qualified Person for Pharmacovigilance (QPPV):

«Your Silent Guardian»

At the heart of this safety system is our Qualified Person Responsible for Pharmacovigilance (QPPV) — a licensed expert whose role is officially recognized by health authorities.

Our QPPV ensures that:

- All adverse drug reactions are collected, evaluated, and reported to health authorities in a timely and transparent way.
- Ongoing safety evaluations (signal detection and risk assessments) are conducted to spot trends or unexpected effects.
- Risk management plans are implemented to minimize harm and maximize benefit.
- Health authorities are notified immediately of any significant safety findings.
- Patients and healthcare providers receive up-to-date, science-based safety information.
- IPI remains compliant with local HA, EMA, FDA, and ICH GVP regulations.
- Promote awareness among patients and public regarding rational use of medicines via effective communication.
- IPI's QPPV plays a crucial role in bridging regulatory authorities & IPI, ensuring effective communication and compliance.

Because You Deserve
Safe and Trusted Medicines

Our QPPV and Pharmacovigilance team **work 7/24** behind the scenes—so you and your loved ones can feel confident that every IPI product you take is backed by a system designed to protect your health, your future, and your trust.
